

BodyWash® Pro - Bathing System

BodyWash® PRO is a bathing system that replaces the traditional bed bath with soap and water.

The very few and mild non-ionic ingredients, ensures that the skin acid mantle is not washed away with the risk of desiccation and subsequent damage to the skin.

BodyWash® Pro is Nordic Swan certified (Svanemærket). The Nordic Ecolabel trademark is a guarantee that products have fulfilled stringent environmental and climate criteria. The Nordic Ecolabel symbolizes our work towards a sustainable consumerism and production, which are key factors in achieving a sustainable society.

The wipe is a Rayon/polyester spunlace - a nice soft quality. Rayon/polyester is unique in its ability to capture dirt and to maintain an even fluid distribution over all the wipes no matter how it is stored.

The bag with the wipes can be heated or cooled before use.
