

ApoWIPE Surface Cleaning - highly efficient cleaning with water and soap

PERFORMANCE LEVEL

Cleans effectively to prevent the build-up of bacteria – tests have shown that ApoWIPE Surface Cleaning reduces the number of test organisms approx. 10 times more effectively than a damp cloth.

The purpose of cleaning is to remove dust, dirt and microorganisms to prevent multiplication of microorganisms. In many situations, cleaning alone, without subsequent disinfection, is sufficient.

ApoWIPE Surface Cleaning is for cleaning all surfaces able to withstand water, for general cleaning and for cleaning prior to disinfection. It can be used in many situations for e.g. equipment around patients, sanitary equipment, door handles, lamps, beds, computers and keyboards.

• Ingredients
