

Skinnies therapeutic is available in 3 different versions

- **Skinnies WEB** for fixation of wound dressings, especially concerning EB and burns
- **Skinnies Silk** for eczema and other skin conditions
- **Skinnies Viscose** for treatment with creams and ointments

Their shared features

360° elasticity
Skinnies are made from a highly elastic and soft material which can be streched in all directions.
Easy to get on and off, are very comfortable and can be worn 24/7.

Seamless design
Skinnies are knitted completely without seams and sharp edges.
You avoid pressure on sensitive areas, especially in the armpits and groin area.

Breathable
Skinnies are very breathable and have temperature regulation.
Heat and moisture is led away from the skin which improves its condtion and increases the comfort of Skinnies.

Aesthetic
Skinnies are discreet and look like regular clothes.
Are available in many versions, sizes and colours - for babies, children and adults.

Durable
Skinnies are robust and can endure over 50 washes.
Can be mashine washed and dry tumbled.

Economic
Skinnies are economic, increase the effect of treatment and create optimal conditions for the skin. The clothes are easy and time effecient to use as they can be mashine washed.

High quality
Skinnies are developed in collaboration with skin specialists and are produced in England.

Skinnies®

THERAPEUTIC CLOTHING FOR BABIES, CHILDREN AND ADULTS

SEAMLESS - STRETCHY - BREATHABLE

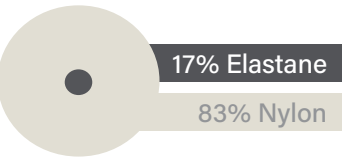

Skinnies WEB
- for fixation of wound dressings

- Especially suitable for people who suffer from Epidermolysis Bullosa and burns.
- Dressings stay in place which optimizes the effect of wound dressings.
- Fast and easy fixation, rendering further fixation unnessecary.
- Regulate temperature and moisture and are very comfortable.

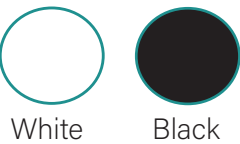

Skinnies WEB are made out of specially developed yarn which guarantees a very high elasticity. The clothes follow the body's movements, reducing the risk of friction and irritation of the skin. Moisture and heat is led away fom the body which ensures optimal conditions for sensitive skin.

Material

Elastane woven with nylon ensures optimal moisture and temperature regulation.

Colours

Machine wash at 60 degrees.

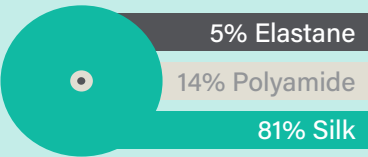

Tumble dry at lowest temperature.

Skinnies Silk
- for eczema and other skin conditions

- Cooling effect reduces the tendency to sweat.
- Regulate moisture and are breathable, providing a fresh feeling.
- Anti-microbial effect reduces the risk of infection.
- Minimize unpleasant odors as the presence of moisture and bacteria is reduced.

Skinnies SILK are made out of silk, a very strong material which does not wrinkle and is fast drying. Silk has the ability to kill bacteria by destroying their the cell walls, reducing the risk of infection. The silk has been rinsed from sericin and is thus hypoallergenic. Does not contain silver.

Material

Elastane and polyamide are woven with silk, meaning only silk comes in contact with the skin.

Colours

Machine wash at 40 degrees.

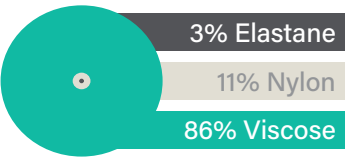

Tumble dry at lowest temperature.

Skinnies Viscose
- for treatment with creams and ointments

- More effective treatment as the moisture of creams of ointments is retained.
- Regulate moisture and temperature. Aid in restoring the skin's hydration.
- Protect clothes and bed linens.
- Follow the body's movements, hereby reducing friction and skin irritation.

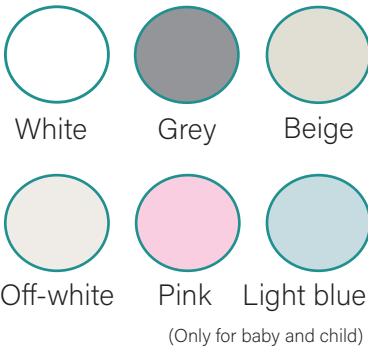

Skinnies Viscose are made out of viscose fibers which is a natural product. Viscose can withstand creams and ointments and has the ability to retain the moisture of creams. This leads to a more impactful treatment as the skin's own moisture levels are optimized.

Material

Elastane and nylon are woven with viscose fibers, meaning only viscose comes in contact with the skin.

Colours

Mashine wash at 60 degrees.

Tumble dry at lowest temperature.
